5th Conference on Field Cycling NMR Relaxometry

Turin (Italy)
May 31 - June 2 2007

The purpose of the workshop is to gather people with active interests in nuclear and electron spin relaxation, fast magnetic field switching experiments, low field magnetic resonance, nuclear electric quadrupole resonance, and magnetic imaging

The discussions will focus on magnetic field cycling experimental techniques, data interpretation and theory, as well as applications in all areas. Related applications performed by other low-frequency and low resolution NMR techniques are welcome as well.

The topics will span a range including experimental issues, interpretative foundations, liquids, solids, porous and heterogeneous materials, polymers, biological materials, and diagnostics.
